

WHAT DO AZPA MEMBERS HAVE TO SAY?

The clearest vision of the association is through the eyes of our members:

- It is great to work with someone and an organization that really "delivers" for its members. That value seems to be getting so rare these days. It makes me glad whenever I recommend AzPA for membership to a colleague! (*Rory Madden, Ed.D., Prescott Valley, AZ*)
- As an early career psychologist, AzPA membership has provided me with opportunities for involvement in leadership, advocacy and government affairs, career advancements, continuing education, referral resources, and current events in psychology.

AzPA membership compliments my interests, experiences, and enthusiasm with leadership, program development, and advancement in the field of psychology. As a member of the Early Career Psychologists (ECP) Committee within the AzPA, I have worked with peers to offer ideas and help organize opportunities for psychologists to collaboratively network and contribute to exciting changes. I have enjoyed and learned from presentations and series offered by this committee that open up opportunities to understand financing, June 10, 2009 academia, and beginning a private practice, etc. Participation in the Legislative Committee has afforded me the chance to participate in state level advocacy and promotion of legislative and governmental action to advance the interests of psychology.

I continue to welcome opportunities for collegial networking, participation in local and national events, and expanding my repertoire by becoming involved in a variety of other areas and meeting additional experienced psychologists. I look forward to future growth and development as an AzPA member. (*Ashley Bittle, Phoenix, AZ*)
